EDUCATION

Carnegie Mellon University in Qatar Bachelor of Science in Computer Science, GPA: 3.91/4.00	Aug 2025 – May 2029 <i>Doha, Qatar</i>
--	---

TECHNICAL SKILLS

- **Languages:** C++, Rust, Zig, Python, Shell, $\text{\LaTeX}$, Assembly.
- **Robotics & Systems:** ROS/ROS2, PatrolBot, Linux, Docker, Socket Networking.
- **Mathematical Modeling:** Gurobi (Optimization), Path Planning, Linear Programming.
- **Tools:** Godot, WGPU (Graphics), Git, CI/CD, Reinforcement Learning Pipelines.

EXPERIENCE

YallaLabs <i>Software Engineer</i>	Jan 2026 – Present <i>Doha, Qatar</i>
• Developed the JavaScript frontend for SNAG, a full-stack campus marketplace serving over 500 students. • Collaborated with a multidisciplinary team to design, implement, and ship user-facing features. • Rapidly prototyped and deployed new functionality using AI-assisted development workflows.	
Human Union Data (YC W24) <i>Software Engineering Intern</i>	May 2025 – Jul 2025 <i>San Francisco, CA (Remote)</i>
• Built containerized Docker environments and task pipelines for Reinforcement Learning agents. • Designed tasksets containing ~2000 tasks focused on autonomous agent decision-making. • Maintained and expanded the <code>hud-python</code> repository for agent-environment interaction.	
Vietnam Mathematical Modelling Competition <i>Lead Researcher</i>	May 2023 – Aug 2023 <i>Hanoi, Vietnam</i>
• Authored a paper on optimizing trajectory flight paths for pesticide-spraying drones. • Developed a scheduling and path-planning model using Gurobi and C++ to improve efficiency. • Achieved First Place globally in a pool of national competitors.	

PROJECTS

Mazegame (Zig, C++, Python)	Apr 2025 – Aug 2025
• Developed a high-performance maze battle engine where agents interact via socket networking. • Engineered a custom matchmaking system to test autonomous generators and solvers in real-time.	
AIX Contract Lifecycle Management (Next.js, TypeScript, React, MongoDB, Pinecone)	March 2026 - April 2026
• Built an AI-powered full-stack platform for contract lifecycle management with automated document analysis, risk assessment, and semantic search. • Developed responsive frontend interfaces using Next.js, React, and TypeScript for contract upload, analytics dashboards, and AI-generated insights. • Integrated LLM-powered contract analysis, vector search, and multilingual document processing into a production-ready web application. • Collaborated in a multidisciplinary team using modern software engineering practices to deliver scalable, user-focused features.	

AWARDS & HONORS

- | | |
|--|------|
| • Gold Medal , International Olympiad in Informatics (IOI) | 2024 |
| • First Place , International Collegiate Programming Contest (ICPC) Quarterfinals | 2025 |
| • Silver Medal , International Collegiate Programming Contest (ICPC) Semifinals | 2025 |
| • Finalist , International Collegiate Programming Contest (ICPC) | 2026 |
